Amendments to the Specification:

Please replace the title of the Specification with:

An Ecdysone Receptor-Based Inducible Gene Expression System

Please replace the abstract with:

ABSTRACT

This invention relates to the field of biotechnology or genetic engineering. Specifically, this invention relates to the field of gene expression. More specifically, this invention relates to a novel inducible gene expression system and methods of modulating gene expression in a host cell for applications such as gene therapy, large-scale production of proteins and antibodies, cell-based high throughput screening assays, functional genomics and regulation of traits in transgenic plants and animals.
